ABOUT US:

If you want to know about **Syncton**, it's really all about you. Simply put, our business model is to make you look good by affecting positive change. While most of our competitors are pushing resumes or one-size-fits-all processes, that's just not our style. We are in the business of providing you with results. We could use this space to explain how our people have done some incredible things. Or we could bore you with the ins and outs of various project management tools and techniques. If you're interested in that we're always happy to discuss it but let's be honest. If you're like most of our clients, you don't really care how we do it. You just want results and that's what **Syncton Cloud Solution** is really all about.

Here are five things you should know about us:

1. Our people have a **track record of delivering results** for our clients.
2. We recognize every project is unique and **we tailor our approach to fit your needs**.
3. We follow a highly scalable, light weight set of project management guidelines, **focused on delivery** not bureaucratic overhead or expensive tools.
4. We specialize in **defining, planning, training and delivering IT projects** ranging from process implementation to infrastructure and custom software development.
5. We pride ourselves on **repeat business and referrals**. That only works when we deliver for our clients.

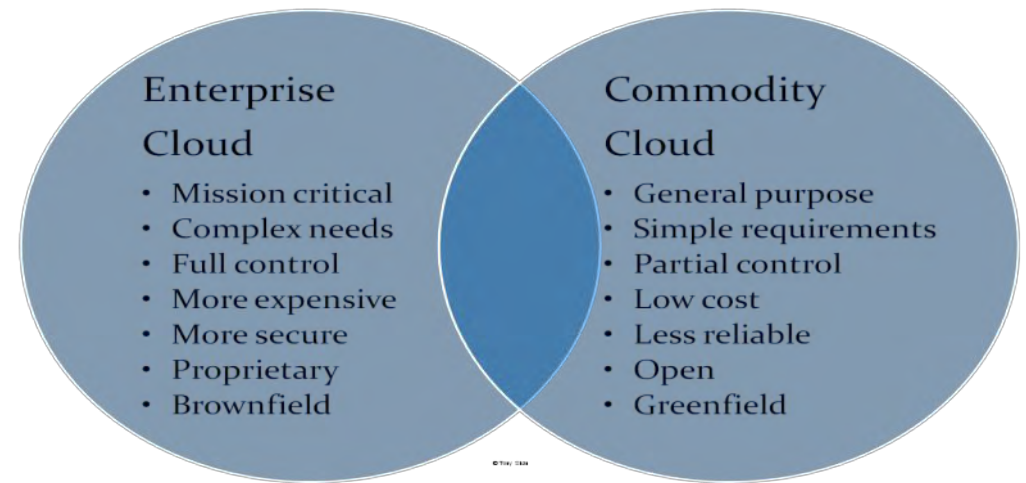

WITH HELP OF SYNCTON CLOUD SOLUTIONS, YOU CAN:

Reduce costs. Every business today must do more with less. We help you maximize IT resources, decrease operating costs, and reduce excess IT infrastructure capacity from your IT infrastructure.

Enhance flexibility and agility. By aligning your IT infrastructure with business priorities, we accelerate your ability to respond swiftly to market demands.

Take advantage of innovation while minimizing risk. Get ahead by leveraging virtualization, cloud computing, the latest data center automation, orchestration, and disaster recovery technologies with our field proven expertise.

CLOUD CONSULTING

PROTECTING YOUR INVESTMENT

The **Syncton Cloud** team is skilled in the areas of network and software architecture in Cloud Computing Technology. To enable you to build on your investment in existing technology, staff and infrastructure, we focus on transferring knowledge to your team at every opportunity, with a goal to generate self-sufficiency as quickly as possible.

sets have come together to deliver and support complex solutions for Tier 1 carriers around the world.

At **Syncton Cloud Solution**, we deliver expert **Cloud Consulting** services to clients worldwide. Our experienced consultants enable your innovative solutions to be designed and built right first time, ensuring earlier achievement of measurable business results. Our consultants work with your team to accelerate the transfer of knowledge, to minimise your risks and to maximise your project outcomes.

GETTING YOU UP AND RUNNING

Engaging with **Syncton Cloud consulting service** early will help get your team up and running and set you on the right course during the planning and design stages of your project.

Syncton Cloud Solution experts can provide valuable early guidance on appropriate solution architectures to address your project's objectives and the underlying business needs. Our expertise will enable you to take optimal advantage of **Syncton Cloud Solution** products and solutions, and to focus on delivering industry leading innovation in your own market.

EDUCATION

Synct on Cloud Consultants provides training courses designed to meet the requirements of architects, developers, system integrators, and support and operations staff. **We are proud to present our self as being one of the first and only institutions in Country to introduce “Cloud Computing (SAAS & PAAS)”**. We have been conducting extensive training by the team of experts from various domains like ecommerce, banking, insurance, telecommunication, etc...

We provide training courses with a range of different approaches to suit the needs of our clients and partners:

SEMINARS

Syncton can arrange 1-2 day seminars to outline horizontal network architectures achievable using an open, event-driven application server and to illustrate examples of services which can be taken to market on our platform. These Seminars can take place at our own Training Center or at your location.

STANDARD TRAINING COURSES

(Please ask for separate **Training Curriculum**)

We offer standard Training Courses covering all aspects of service architectures, development, and the deployment and operation of our platforms and solutions, to enable you to deliver results successfully. At **Syncton**, we continually feed real world experience into our training programs, to ensure they maintain direct relevance to our customers' needs.

CUSTOMIZED TRAINING COURSES

Specifically tailored training courses to meet your specific needs.

Please contact us at training@syncton.com for further details on any of these courses, or to discuss your specific needs.
